

Bako Nationalpark

Dauer	3 Tage
Produkt	Gruppenreise
Start	Täglich, ab 2 Personen
Reiseleitung	Englischsprachig
Mahlzeiten	Inklusive Vollpension
Von - Bis	Kuching City

Program

Day 1 **Kuching – Bako**

Pick-up from the city Hotel and drive by car to Bako village. Arrive at the jetty and board a boat for a 20 minutes' ride to the national park. After registration at the park, leave your luggage at the park's storeroom and proceed for your trekking in the park.

Telok Paku trail – Takes about one hour of trekking and passes through cliff forest before reaching a small secluded beach. Proboscis monkeys can often be seen here during early morning or late afternoon. Move slowly, keep as quiet as possible and listen out for strange grunts or movements in the canopy. Trek back to the park's canteen for your lunch. After lunch, check-in to your Rest house before you take up another trail.

Telok Delima – This trail leads through different vegetation and ends in mangrove forest, which is prime proboscis monkey territory. The trail is also very educational to learn about palm vegetation where reeds, rattans, nibong palms etc. are at large. Return back and rest is free and easy until dinner.

After dinner at the park canteen, you may go for a short night walk accompanied by your guide (subject to weather conditions) before retiring for the night.

Accommodation **National Park Resthouse**

Day 2 **Bako**

Breakfast at the park canteen, after which you will be taken on the Lintang loop trail which is a very popular trek as it passes through nearly all of the vegetation types found at Bako. The whole trek takes between 3 to 4 hours excluding the diversions to couple of other shorter trails along this loop.

After a quarter of this trail walk, you may opt to divert to Telok Pandan Kecil trail. This 45 minutes' (per way) trek to Telok Pandan Kecil is one of Bako's most popular spots. It ascends the forested hills overlooking Telok Assam, reaching a plateau covered in shrub vegetation and continues along a sandy path lined with carnivorous pitcher plants, before reaching a cliff top with stunning views of the secluded beach below and the famous sea stack just offshore. Trek back the same way to Lintang loop trail again and continue along Lintang trail back to the park headquarter.

Accommodation **National Park Resthouse**

Day 3 **Bako – Kuching**

After breakfast at the canteen, you may wish to spend your own time around the park headquarter or discuss with your guide about any other short trails that would interest you before check-out from your Rest house.

After lunch depart by boat back to Bako village jetty and return to Kuching City by car.

The tour ends in Kuching City
